

PHAN HONG TRINH

Linh Trung, Thu Duc, Ho Chi Minh City | 0327377569 | phanvanbin232@gmail.com | GitHub: github.com/trinhph1704
Full Stack Developer | Frontend | SAP ABAP

SUMMARY

Full-stack developer with hands-on experience in React, Next.js App Router, Firebase, Supabase, PayOS, and SAP ABAP. Strong in payment flows, role-based access control, performance tuning, and internal business tools.

EDUCATION

FPT University, Bachelor of Software Engineering

Focus: web development, software engineering, teamwork, and project delivery. 2021 - 2025

SKILLS

Technical: React / Next.js App Router / TypeScript, JavaScript / HTML / CSS, Tailwind, Ant Design, RESTful API, Axios, Firebase (Firestore / Storage / Admin SDK), Supabase, PayOS, JWT / RBAC, Zod, React Hook Form, Git / GitHub / GitLab, Figma, ABAP / SAP (SD, MM, PP).

Soft: Excel / Word, time management, multitasking, problem solving, onboarding and mentoring, communication, teamwork.

SELECTED IMPACT

- Delivered 2 full-stack platforms with Next.js App Router, Firebase / Supabase, and PayOS.
- Reduced UI re-render lag by 40% and improved checkout flow through Redux and component optimization.
- Reduced input errors by 80% (F4 Search Help) and 90% (dynamic ABAP CRUD system).
- Built 66+ REST endpoints, 40+ API routes, and 40+ pages across freelance projects.

WORK EXPERIENCE

Freelance Full Stack Developer - Bloodline DNA 10/2025 - 03/2026

Next.js App Router / Supabase / PayOS / Tailwind / Ant Design / mobile-first

- Built an end-to-end DNA test booking flow with Next.js App Router, Supabase, and PayOS.
- Developed 40+ API routes, role-based dashboards, and secure file uploads to Supabase Storage.
- Implemented payment webhook synchronization and a responsive mobile-first interface.

Freelance Full Stack Developer - StudyHub 06/2025 - 12/2025

Next.js App Router / React 19 / Firebase / PayOS / JWT / RBAC / 40+ pages / 66+ REST endpoints

- Built a learning platform with payment, authentication, authorization, and an admin dashboard.
- Completed 66+ REST endpoints and 40+ pages; integrated PayOS webhook for real-time payment updates.
- Improved user experience with image optimization, caching, and reusable UI patterns.

Frontend Developer Freelance - ColorDanHub 09/2024 - 01/2025

React / Redux / Figma / PayOS / e-commerce frontend

- Built the storefront and checkout flow for an e-commerce platform using React and Redux.
- Reduced re-render lag by 40% through state optimization and clearer component boundaries.
- Improved checkout flow and fixed 20+ issues in core purchase features.

SAP ABAP Developer Intern - FPT Software HCM 05/2024 - 08/2024

ABAP / Dynpro / Menu Painter / SQL optimization

- Developed 10+ ABAP programs and supported screen logic and module-based business rules.
- Achieved 100% unit test pass rate and reduced runtime by 30% through SQL optimization.
- Worked with Dynpro, Menu Painter, and SAP SD / MM / PP concepts in a team environment.

Frontend Developer Freelance - AngelDisableHelpLLC 02/2024 - 04/2024

Figma to WordPress / RESTful APIs / real-time updates

- Converted Figma designs to WordPress and integrated RESTful APIs for content updates.
- Reduced latency by 50% and improved the maintenance workflow for the client team.

PROJECTS

ColorDanHub | Frontend E-commerce — React, Redux, Figma, PayOS, Git; reduced lag by 40% and improved payment completion.

Portfolio Website | Multilingual Full Stack — React, Vite, Tailwind, Framer Motion; VI / EN portfolio with engagement-focused motion.

SAP Student Management | SAP / ABAP — F4 Search Help reduced input errors by 80%; ALV Grid with multi-table JOIN. TCODE: YTRINH170414.

Capstone ABAP Program | Dynamic Z Table Data Editing — CRUD, backup / restore, Excel import / export, and email; reduced input errors by 90%. TCODE: ZSU25_GSU25SAP03.

ADDITIONAL EXPERIENCE

Store / Warehouse Roles - Nitori, Korean Mart, Vinmart+ | Managed 500+ SKU, handled 200+ transactions per day, trained 5+ new staff, and reduced order processing time by 20%.
